Kangaroo Lite

DANISH CRAFTSMANSHIP SINCE 1932

At Winther Bikes we ensure safe, comfortable and durable transportation for families around the world. All Winther cargo bikes are built by hand at our premises in Denmark. Each bike is delivered 100% assembled and taken for a test ride before dispatch to gain the highest level of inspection and quality control. We use carefully selected components so that you will have a cargo bike with a long lifespan and a minimum of maintenance.

ACCESSORIZE IT

Do you need a baby seat? Toddler seat cushion, storage pockets in the cabin, a rain cover or insect net? If so, go online and check out all accessories on visit wintherbikes.com

FAMILY TIME ON THE GO

Choosing a cargo bike may be motivated by many different needs. Practical needs like getting there faster when the traffic is heavy or enjoying saving money on parking, insurance costs and maintenance. It may also be a positive lifestyle choice. Showing the next generation that you can do without a car, making kids enjoy cycling and the freedom it offers, considering your environmental impact.

Comfortably And Safely Every Day

Kangaroo Lite's user friendly design delivers everything you need in a durable cargo bike. It's spacious cabin has plenty of space for children up to 130 cm tall. The low entrance point makes it is easy for children to enter and exit the cabin themselves saving the adult from many lifts. Kangaroo Lite is equipped with hydraulic disc brakes, reinforced front frame, shock absorbing cabin base and strong aluminium bars for head protection above the seats as standard. All Winther cargo bikes offers 5-point safety harnesses, seats with neck support for additional protection and visible reflectors on wheels, frame, cabin base and hood.

ANTI-THEFT

Each bike has it's own unique and visible frame number.

THOUGHT-THROUGH IN EVERY DETAIL

When developing our cargo bikes we focus on the details that make everyday life easier for mom, dad and children. The soft toddler seat cushion is a comfortable extension of our seating system for children between 9 and 18 months who can sit themselves but are still too small for our regular seats. The sunroof and side windows are extra convenient when wanting to keep eye contact with the child. Behind the seats, there is plenty of room for storage, so you avoid overcrowding the cabin.

SPACIOUS ROOM FOR UP TO FOUR KIDS

The spacious cabin offers many seating combinations. Bring your baby along using the Weber baby seat or combine it with two normal seats. The children are safely seated under the solid aluminium bars that, besides holding the cabin cover, also offer head protection.
